VI. *Part of a Letter from* Mr. Llwid *to Dr.* Tancred Robinſon, *F. R. S. concerning a Figured Stone found in* Wales; *with a Note on it, by* Hans Sloane, *M. D.*

I Here ſend you the Repreſentation of a Limeſtone-Marble, we have lately Diſcovered in this Country, when Poliſh'd. We have Plenty of it; but few pieces exceed Six, Nine, or Twelve Inches Diameter; for 'tis only a ſort of *Alcyonium*, incorporated in ſeveral ſmall blocks of the Lime-ſtone; whereof the firſt Figure repreſents a piece poliſh'd Perpendicularly, and the other Horizontally. I would intreat you to Diſcourſe ſome Stone-Cutter, and to adviſe me what Uſes it might ſeem proper for, &c. 'Tis (to me) more Beautiful than the *Florentine Marble*, but much more hard and ſubſtantial. I ſhould be glad of a Line or two about it.
